Secondary Education

Short Summary

In this project a short e-learning course was developed to involve into Safer Internet day 2014 as well as into the national campaign „NO to the hate speech on Internet“. We have introduced the students with challenges and threats on the Internet as well as with possibilities for protection of these threats. In addition, the students were introduced with new means of learning and with a number of web 2.0 to grow their creativity.

Duration of the implementation

2014-02-10 14:30:00 - 2014-04-27 13:30:00

Difficulty of ICT solutions used

Detailed description

Age of learners

15 - 20

Learning outcomes

Learners will learn how to use web 2.0 tools and to understand threats on Internet. They will be able to critically assess different content on Internet.

Detailed description

The course was conducted in combination of face2face learning and virtual classroom. In face2face communication we introduce new concepts and give weekly assignments to students. The students do their assignments in virtual classroom of the course using ICT from home, library or smart phones. After the assignments are done, we comment the solutions in class and solve the problems in using the course.

In this project learning we have introduced the students with challenges and threats on the Internet as well as with possibilities for protection of these threats. In addition, the students were introduced with new means of learning and with a number of web 2.0 to grow their creativity. In this project, collaboration among students and teachers was very constructive.

Learning Activities / Implementation

Introducing the students with the Loomen environment.

Using the course "Sigurnost na internetu" / „Safer Internet“, reading content, knowledge testing. The password for accessing the course is „ekonomac“.

Involving into national campaign „NO to the hate speech on Internet“.

Publishing students works on the Facebook page of the campaign.

Design of web pages using WordPress, for example <http://darina-boban.from.hr/>.

Using web 2.0 tools Linoit, StickyMoos, Glogster:

<http://linoit.com/users/JozPa/canvases/Na%C5%A1e%20mi%C5%A1ljenje%20o%20...>

<http://stickymoose.com/hV9vDlo7EfK1HLV>

<http://dujepetricevic.edu.glogster.com/dislajkaj-mrznju> ;

<http://huliganka.edu.glogster.com/new-glog/>

Designing a poster at the school library.

Developing and conducting a quiz „Safer Internet“.

Designing presentation using Prezi and publishing on the school web-site:

<http://prezi.com/ggywtjda7gri/nacionalna-kampanja-ne-govoru-mrznje-na-in...>

Project evaluation through a survey in Loomen.
